

6. What is Type Casting?

Answer: Type casting means converting one data type into another.

Real-World Example: Converting kilograms into grams.

7. What is the difference between List and Tuple?

Answer: A List can be changed, but a Tuple cannot be changed.

Real-World Example: Shopping list (List) vs Date of Birth (Tuple).

8. What is a List?

Answer: A List stores multiple items and can be modified.

Real-World Example: A shopping cart.

9. What is a Tuple?

Answer: A Tuple stores multiple items that cannot be changed.

Real-World Example: Your Aadhaar number.

10. What is a Dictionary?

Answer: A Dictionary stores data as key-value pairs.

Real-World Example: Phone contacts (Name → Phone Number).
